- Firebase
- Redis
- Sketch
- Photoshop
- Illustrator
- Invision App
- Procreate
- Web
- Mobile
- Hybrid App
- Native App
- Responsive Design

Experience

UX Engineer

Google - Contractor
(2018 - 2020)

Used Google's fullstack proprietary frameworks/tools to release a gallery app for the Crowdfunder team, coded various mobile features, and designed their mascot.

Design Engineer

eBay - Contactor
(2016 - 2018)

Assisted engineering team with implementing design mocks into accurate HTML, CSS, and JavaScript on an Angular 2 codebase using their Github workflow.

Designer

Guidebook
(2013 - 2015)

Led the successful redesign of their guide creation and management tool (Gears). Helped build the web version of the app and created various mobile app UI mocks.

Product Designer

WePay
(2011 - 2013)

Designed numerous features, flows, and landing pages as their only designer for nearly a year. Troubleshooted frontend code. Acquired for \$400 M by Chase in 2017.

Designer

Bebo
(2011)

Lead the redesign of the whole social network for its 10 million+ active monthly users. Provided UI and marketing design work for both web and mobile.

Designer

Friend.ly
(2010)

Hired on as their first designer to assist with landing pages and feature designs for a few months. Friend.ly was later acquired in 2011 by Facebook.

References

Derek is a terrific designer who can design great looking websites, along with having amazing CSS/HTML to make those designs something engineers can go and implement. I enjoyed working with Derek and would recommend him as a top UI/visual designer.

Akash Garg
CTO @ Bebo
2011

A hard worker and excellent illustrator. He made great strides as a designer since joining WePay. It was a pleasure collaborating with Derek on the projects our team was tasked with.

Dylan Wreggelsworth
Designer Coworker @ WePay
2012

Derek is a very gifted front end developer. He has the eye of a designer, with the skillset of a developer, which is a very rare combination. He brings the designers mockups to life and often they look better once he's coded it up, than the mockup. He was a true asset to our team at eBay and will be an asset to whichever team he works with.

James Doran
UI Designer @ eBay
2018
